PORTFOLIO
davidudezue-web.github.io/Blossom-portfolio

CORE COMPETENCIES

- Data Analysis & Interpretation
- Microsoft Excel & Data Processing
- SQL & Structured Data Analysis
- Power BI Dashboard Development
- Data Cleaning & Validation
- Data Reconciliation & Quality Checks
- KPI Monitoring & Performance Reporting
- Data Visualisation & Business Intelligence
- Sales & Business Performance Analysis
- Data Modelling & DAX
- Business Operations & Problem-Solving
- Technical Training & Knowledge Transfer

TOOLS

Microsoft Excel · Power BI · SQL
Power Query · DAX

01 Professional Summary

Data Analyst and Business Intelligence professional with an academic background in **Mathematics and Statistics** and practical experience in business operations, data analysis, reporting, digital skills training, and business performance evaluation.

Proficient in using **Microsoft Excel, SQL, and Power BI** to organise and analyse data, validate records, calculate key performance indicators (KPIs), develop dashboards, and communicate business insights. Experienced in developing practical analytics projects and applying structured problem-solving to improve reporting accuracy and support informed decision-making.

As the founder of **Blossom Graphviz Concept** and **BlossomViz Academy**, I combine analytical thinking, business understanding, technology, and professional training to deliver data-driven solutions and practical digital skills development.

02 Professional Experience

Founder & Business Consultant

CURRENT

Blossom Graphviz Concept (BGC) · Nigeria

- Lead business and consulting activities focused on creative solutions, technology, and data-driven growth across client engagements.
- Apply analytical thinking to business performance evaluation, KPI tracking, and decision support for business clients.
- Develop data analytics and business intelligence projects using Excel, SQL, and Power BI, covering dashboards, KPI reporting, and data visualisation.
- Coordinate service delivery, manage client relationships, and contribute to the company's professional and digital presence.
- Design and deploy data-driven solutions that connect business objectives with measurable performance indicators.

Founder & Digital Skills Trainer

CURRENT

BlossomViz Academy · Nigeria

- Develop and deliver practical digital skills training in data analytics and professional technology tools to aspiring data professionals.
- Teach learners to approach data tasks systematically, from organising and cleaning information to analysing results and communicating findings.
- Design instructional materials, practical exercises, and project-based learning activities to support real-world skill development.
- Guide learners through analytical concepts, spreadsheet operations, reporting workflows, and business intelligence fundamentals.
- Promote the application of digital skills to real-world business and career development challenges, including portfolio development and job readiness.

EDUCATION

Higher National Diploma (HND)
Mathematics & Statistics
Federal Polytechnic Oko, Anambra State
Completed 2022

National Diploma (ND)
Mathematics & Statistics
Federal Polytechnic Oko, Anambra State

PROFESSIONAL STRENGTHS

- Strong numerical and analytical reasoning
- Attention to detail and data accuracy
- Structured problem-solving approach
- Business-focused interpretation of data
- Clear communication of analytical findings
- Practical training and knowledge-sharing
- Commitment to continuous learning

03 Technical Skills

Microsoft Excel	Spreadsheet analysis, data organisation, calculations, reporting, and data validation across complex business datasets.
Power BI	Interactive dashboards, KPI cards, data visualisation, data modelling, and DAX measures for business performance reporting.
SQL	Structured data querying and analysis for extracting, filtering, and aggregating business data from relational sources.
Power Query	Data transformation, cleaning, and preparation, automating ETL steps for reproducible analysis workflows.
Business Intelligence	Performance monitoring, analytical reporting, and translating raw data into business insight through visual and narrative formats.
Reporting	Presenting numerical findings and KPIs in clear, business-focused formats for management and non-technical stakeholders.

04 Selected Analytics Project

Sales Performance Analysis: Tofred Global Building Materials

Period analysed: **3–17 January 2025** · Tools: Power BI, Excel, DAX, Data Validation · View Portfolio

Analysed and validated 30 sales transactions for a building materials company operating across two branch locations. Cleaned a messy raw dataset, standardised inconsistent fields, and produced a Power BI dashboard presenting executive-level performance metrics.

TOTAL REVENUE	TRANSACTIONS	AVG. TRANSACTION	UNITS SOLD
₦3,339,100	30	₦111,303	434

- Cleaned and standardised a raw Excel dataset containing six date formats, mixed-type quantity fields, text-formula totals, and systematic branch misspellings.
- Built pivot tables analysing revenue by date, branch location, product, and customer type, confirming Masaka branch at 59.3% revenue share.
- Developed a Power BI dashboard with KPI cards, branch comparison visuals, product performance ranking, and customer segment analysis.
- Verified all transaction totals against Quantity × Unit Price calculations to confirm data accuracy across all 30 records.
- Structured findings into an executive summary suitable for management review and business decision-making.
